One Day Pre-Conference Workshop • November 12th, 2017

ADVANCES IN RESPIRATORY CARE
OBJECTIVES:
Upon completion of this course, participants will be able to:
• Become familiar with the current approaches to using hypothermia to treat HIE in neonates
• Be able to assess the future approach to screening for metabolic diseases in the newborn
• Analyze the approaches to the long term management of infants with Bronchopulmonary Dysplasia
• Contrast the pros and cons of various approaches to the management of patent ductus arteriosus in the neonate
• Identify the diagnostic and interventional approaches to neonatal hematoLOGIC coagulation disorders
• Determine the acute and long term impact of viral infections on the neonatal brain
• Examine novel approaches to optimizing nutrition and growth of low birth-weight, premature infants
• Appraise the implications of over and under nutrition on long term outcome and determine best practices to improve growth and development
• Apply the most current approaches to the diagnosis, prevention and management of newborn central nervous system insults
• Determine best practices for ventilator management in infants with respiratory failure
• Examine the current approach to the diagnosis, safe monitoring and management of infants exposed in-utero to the Zika Virus

DATES: Sunday, November 12th thru Wednesday, November 15th, 2017
PLACE: Loews Miami Beach, Florida
